

# Accelerated Construction Craft Worker

**Construction Craft Workers** work with a great number of tools. They are truly the jack-of-all trades at building sites. Construction Craft Workers unload machinery and building materials and build scaffolding and barricades. When a job begins, their tasks include excavating and levelling building sites, building forms for concrete, and pouring, mixing and spreading concrete. Once the job is completed, they disassemble all the equipment used and clean up the site, including removing debris. They also work on roads, bridges, pipelines, and mining sites. Construction Craft Workers assist various other tradespeople, such as carpenters, plumbers, glaziers, roofers, and drywallers.

In this program, students complete the "Level One" portion of the in-school apprenticeship training for Construction Craft Worker. The education and training opportunities are provided at the home school and E.H. Mancinelli Training Centre in Winona . Upon successful completion of the in-school program, students are dispatched to a work-site for their Cooperative Education placement which lasts until the end of the semester.
